GLOBE The globular form of the earth, the five zones, some of the principal circles of the sphere, the opacity of the moon, and the true causes of lunar eclipses, were taught, and an eclipse predicted, by Thales of Miletus, about 640 B C Pythagoras demonstrated, from the varying altitudes of the stars by change of place, that the earth must be round, that there might be antipodes on the opposite part of the globe, that Venus was the morning and evening star, that the universe consisted of twelve spheres—the sphere of the earth, the sphere of the water, the sphere of the air, the sphere of fire, the spheres of the moon, the sun, Venus, Mercury, Mars, Jupiter, Saturn, and the spheres of the stars, about 506 B C —Aristarchus of Samos maintained that the earth turned on its own axis, and revolved about the sun, which doctrine was held by his contemporaries as so absurd that the philosopher nearly lost his life, 280 B C, see *Circumnavigators*

To determine the figure of the earth, a degree of latitude has been measured in different parts of the world by Bouguer and La Condamine in Peru, and by Mauper tuis and others in Lapland, 1735

ARTIFICIAL GLOBES. It is said that a celestial globe was brought to Greece from Egypt, 368 B C., and that Archimedes constructed a planetarium about 212 B C

The globe of Gottorp, a concave sphere, eleven feet in diameter, containing a table and seats for twelve persons, and the inside representing the visible surface of the heavens, the stars and constellations, all distinguished according to their respective magnitudes, and being turned by means of curious mechanism, their true position, rising and setting, are shown The outside is a terrestrial globe. The machine, called the globe of Gottorp, from the original one of that name, which, at the expense of Frederick II duke of Holstein, was erected at Gottorp, under the direction of Adam Olearius, and was planned after a design found among the papers of the celebrated Tycho Brahe Frederick IV of Denmark presented it to Peter the Great in 1713 It was nearly destroyed by fire in 1757 but it was afterwards reconstructed. *Coxe.*

The globe at Pembroke hall, Cambridge, erected by Dr Long (master, 1733), eighteen feet in diameter

GRAVITATION, as a supposed innate power, was noticed by the Greeks, and also by Seneca, who speaks of the moon attracting the waters, about 38 Kepler investigated the subject about 1615, and Hooke devised a system of gravitation about 1674 The principles of gravity were demonstrated by Galileo at Florence, about 1633, but the great law on this subject, laid down by Newton in his "Principia," in 1687, is said to have been proved by him in 1670 The fall of an apple from a tree in 1666 is said to have directed his attention to the subject

Newton says I do not anywhere take on me to define the kind or manner of any action, the causes or physical reasons thereof, or attribute forces in a true and physical sense to certain centres when I speak of them as attracting or endued with attractive powers

On 15 July, 1867 M Chasles laid before the Paris Academy of Sciences some letters alleged to be from Newton to Pascal and others tending to show that to Pascal was due the theory of gravitation The authenticity of these letters was authoritatively denied, and their forgery and his own delusion were acknowledged by M Chasles before the academy 13 Sept 1869

GULLIVER'S TRAVELS, by Dean Swift, first published 1726-7

GUN, see *Artillery, Cannon, Fire-arms* —**GUN-CLUB**, for pigeon-shooting, founded by sir Gilbert East in 1862

GUN-COTTON, a highly explosive substance, invented by professor Schonbein, of Basel, and made known in 1846 It is purified cotton, steeped in a mixture of equal parts of nitric acid and sulphuric acid, and afterwards dried, retaining the appearance of cotton wool See *Collodion* Its nature was known to Braconnot and Pelouze

The diet of Frankfort voted, 3 Oct 1846, a recompense of 100,000 florins to professor Schonbein and Dr Bœttger, as the inventors of the cotton powder, provided the authorities of Mayence, after seeing it tried, pronounced it superior to gunpowder as an explosive

Improvements were made in the manufacture of gun cotton by an Austrian officer, Baron von Lenk, about 1852, and it was tried by a part of the Austrian army in 1855 but did not obtain favour

In 1862 details of the manufacture were communicated by the Austrian government to our own government and Mr (late sir Frederick) Abel, our war office chemist, was directed to experiment on the constitution and desirability of gun cotton The British Association also appointed a scientific committee to consider its merits A complete decision was not arrived at

The first trial of English made gun cotton was made in the spring of 1864, at the manufactory at Stowmarket, Suffolk, by Messrs Prentice

There was manufactured, by a company, the "patent safety gun cotton, according to Mr Abel's patent (including the pulping, compressing, and wet processes), based on researches commenced in 1866. The cotton was said to be explosive by detonation, and not by ignition A great explosion took place at Stowmarket, 24 persons were killed (including A. E H and W R Prentice, managers) about 60 were dreadfully wounded, and nearly the whole town was destroyed as if by a bombardment 11 Aug 1871

The verdict at the inquest attributed the explosion to the culpable "addition of sulphuric acid to the gun-cotton subsequent to its passing the tests required by government," 6 Sept 1871

A government commission appointed in Sept. to consider the manufacture and use of gun-cotton, reported in favour of both, with special regard to compressed gun cotton, 13 Dec 1871

Another report recommended this gun-cotton to be stored wet, with drying apparatus near, and to be kept in slighter boxes, 25 July, 1872

Mr E O Brown, of the war department, Woolwich, discovers that wet gun cotton can be exploded by concussion by a detonating fuse, about Nov 1872.

It is used as an explosive agent in mining, &c

GUNPOWDER The invention of gunpowder is generally ascribed to Bertholdus or Michael Schwartz, a Cordelier monk of Goslar, south of Brunswick, in Germany, about 1320 But many writers maintain that it was known much earlier in various parts of the world Some say that the Chinese and Hindoos possessed it centuries before Its composition, moreover, is expressly mentioned by Roger Bacon, in his treatise *De Nullitate Magiæ* He died in 1292 or 1294 Various substitutes for gunpowder have been invented, such as the white gunpowder of Mr Horsley and Dr Ehrhardt, and gun-paper by Mr Hochstodten A new gunpowder by M Newmayer, of Toya, near Leipsic, was discussed in Nov 1866 "Pellet gunpowder" was ordered to be used in gun-charges in the army, March, 1868 An act to amend the law concerning the making, keeping, and carriage of gunpowder, &c was passed 28 Aug 1860, and other acts since See *Birmingham*, 1870 In May, 1872, a company was formed to manufacture Mr R Punshon's patent cotton-gunpowder, asserted to be very safe and controllable The manufacture of the German "brown" or "cocoa" powder was set up at Chilworth in Surrey, 1886 See *Chronoscope*

The use of gunpowder was denounced by Ariosto, 1516 by Jean Marot 1532 by Cervantes, 1604 termed 'villanous salt petre' by Shakspeare, about 1598

ENGLISH WAR GUNPOWDER 75 parts nitrate of potash (saltpetre) 10 sulphur 15 carbon These proportions may be slightly varied

Mr Gale, a blind gentleman of Plymouth, on 22 June, 1865, patented his method of rendering *gunpowder uninflammable* by combining with it finely powdered glass, which can be readily separated by a sieve when the powder is required for use Successful public experiments were made

Mr Gale exhibited his process before Queen Victoria at Windsor, 10 Nov 1865 and it was severely tested at a martello tower, near Hastings, 20 June, 1866 The attainment of perfect security was still doubtful. Gale's Protected Gunpowder Company was formed, Oct. 1865, and wound up, March 1867

HEAT (called by French chemists Caloric) Little progress had been made in the study of the phenomena of heat till about 1757, when Joseph Black put forward his theory of latent heat (heat, he said, being absorbed by melting ice), and of specific heat Cavendish, Lavoisier, and others, continued Black's researches Sir John Leslie put forth his views on radiant heat in 1804 Count Rumford put forth the theory that heat consists in motion among the particles of matter, which view he supported by experiments on friction (recorded in 1802) This theory (now called the dynamical or mechanical theory of heat, and used to explain all the phenomena of physics and chemistry) has been further substantiated by the independent researches of Dr J Meyer of Heilbronn and of Mr James P Joule of Manchester, who assert that heat is the equivalent of work done Mr Joule in his papers published 1841–2, laid the foundation of the science of thermo-dynamics, on which he worked till his death 11 Oct 1889 The Joule Memorial fund proposed, 30 Nov 1889, was instituted by the Royal Society, Jan 1890 In 1854, Sir William Thomson (after lord Kelvin), of Glasgow published his researches on the dynamical power of the sun's rays Thermo-electricity, produced by heating pieces of copper and bismuth soldered together, was discovered by Seebeck in 1823 A powerful thermo-electric battery was constructed by Marcus of Vienna in 1865 Professor Tyndall's "Heat, a Mode of Motion," first published Feb 1863, third edition, 1868, sixth edition, 1880 The researches of philosophers are still devoted to this subject, see *Boiling* and *Calorescence* Greatest heat in the hot summer of 1868 at Nottingham, in sun, 122 4, in shade, 92 2, 22 July, 1 p m 14 Aug 1876, 95 7 in the shade 147 in sun, 26 June, 1878, 95 in the shade

Captain John Ericsson constructed a ship, in which caloric, or heat, was the motive power On 4 Jan 1853, it sailed down the bay of New York, at the rate of 14 miles an hour, it is said at a cost of 80 per cent less than steam Although caloric engines were not successful, capt Ericsson continued his experiments, and patented an improved engine in 1856 In 1868 he proposed condensation of the sun's rays, and their employment as a motive power, in March, 1889, he exhibited his apparatus in New York shortly before his death, aged 86

HIGHER CRITICISM The terms "higher" and "lower" criticism were adopted and are used with specific reference to the criticism of the Bible *Higher* criticism is the criticism of the literary forms and contents of the Bible, *lower* criticism is the criticism of the text of the Bible—of the original languages in which it was written The Bible was written by many men and in three languages, Hebrew, Chaldee, and Greek These languages have become dead languages, but they survive in written documents, and in these languages the Bible in the original is preserved to us Criticism of the literary forms and contents of the Bible is necessary in order to establish true principles of Biblical interpretation, and to get at the intended and true meaning of the Bible The doctrine of the divine inspiration of the Bible does not reach to the letter of the Bible, for that would mean the creation of a special and holy language through which to give the Bible to man The Bible comes to us through human language as it is, and not as we imagine it might be or ought to be The language is the language of man, and therefore fallible The text of the Bible therefore depends for its accuracy upon the attention and care of successive generations of copyists Thus Bible criticism is necessary to ascertain the true text of the Bible, and what its contents really are In the higher criticism of the Bible there are four questions to be determined —(1) Its integrity to decide whether the writing in question is the work of a single author or a combination of writings by more than one author, whether it has received additions by editing in later times, or is in its original condition What the parts are—which original and which added, and how and when the additions were made (2) Its authenticity this asks the question, does the writing bear the author's name, or is it anonymous? If the name is given, is the title a true one or a forgery, or is it anonymous? and if anonymous, what is its use as a writing? (3) Its literary forms to determine the style and literary method of the various writers (4) Its credibility the answer to the question, are the writings which compose the Bible true? The result of the investigations of the higher criticism, so far as it has gone, has been partly destructive, for there were undoubtedly errors both in the Bible itself and also, and to a much greater extent, in its traditional interpretation by orthodox Christians, but this work has also been constructive, by clearing away from the Bible what was untrue, and establishing what is true and divine The Reformation in the 16th century released the critical mind of Europe, and gave it liberty to work, with the result that a new spirit and method of inquiry arose, and were made use of in the search for the true meaning and worth

of the Bible At this time, it is true, the main effort was put forth in the defence of the original text, and for the simple grammatical exegesis of the Bible as against that of the Vulgate and traditional authority, but both Luther and Calvin worked upon questions of the higher criticism Calvin, for example, denied that St Paul was the author of the Epistle to the Hebrews He also claimed that the Book of Psalms was a collection of psalms, and that David was not the author or even editor of the entire book Luther denied that the Epistle of St James was by an apostle, and was quite willing, apparently, to allow that the whole Pentateuch was not written by Moses But questions of authorship were not the prominent questions at this time in Biblical inquiry and research The father of the higher criticism is the German Eichorn, in the last quarter of the 18th century In the Book of Genesis Eichorn traces the marks of two sets of documents — one Elohistic, and the other Jehovistic — and thus makes the book the work of two authors The critical work begun by Eichorn went on in Germany, but owing to the fact that English divines were at this time engaged in bitter conflict with deism, the higher criticism had very little effect in England It was not till the 19th century that English scholars really awoke to questions of Biblical criticism It began with bishop Colenso's attack upon the historical books of the Pentateuch and that of Joshua Since Colenso's time we have had such scholars as bishop Lightfoot and Robertson Smith, and in the present day there are at work among us upon questions of the higher criticism such men as professors Driver and Kirkpatrick

HOLSTEIN AND SCHLESWIG (N W Germany), duchies once belonging to Denmark The country, inhabited by Saxons, was subdued by Charlemagne in the beginning of the 9th century, and afterwards formed part of the duchy of Saxony In 1106 or 1110, Adolphus of Schauenberg became count of Holstein his descendants ruled till 1459, when Adolphus VII died without issue, and the states of Holstein and Schleswig elected Christian, king of Denmark, his nephew, as their duke, through fear of his arms In 1544, his grandson, Christian II, divided his states amongst his brothers, with the condition that the duchies should remain subject to Denmark. The eldest branch of the family reigned in Denmark till the decease of Frederick VII, 15 Nov 1863 From a younger branch (the dukes of Holstein-Gottorp) descended through marriage, the kings of Sweden from 1751-1818, and the reigning family in Russia since 1762, when the duke, as the husband of Anne, became czar In 1773, Catherine II of Russia ceded Holstein-Gottorp to Denmark in exchange for Oldenburg, &c The duchies were occupied by the Swedes in 1813, but restored to Denmark in 1814, and on 28 May, 1831, constituent assemblies were granted to them Since 1844 disputes have been life between the duchies and Denmark, and in 1848 the states-general of the duchies voted their annexation to the German confederacy, in which they were supported by Prussia, war ensued, which lasted till 1850, when they submitted to Denmark The agitation in the duchies, encouraged by Prussia, revived in 1857 The Germans in Schleswig desired it to be made a member of the German confederation, like Holstein, but both duchies demanded a local government more independent of Denmark, which changes were resisted by that power For the events of the war of 1864, see *Denmark* By the convention signed at Gastein (*which see*), 14 Aug 1865 the government of Holstein was left with Austria, and that of Schleswig with Prussia The whole of Holstein and part of Schleswig were ceded to Prussia by the treaty of Prague, signed 23 Aug 1866 The 5th clause, directing North Schleswig to be given to Denmark if the people voted for it, was not acted on, although claimed, and was abrogated, Feb 1879 Expulsion of Danes, see *Prussia*, Oct 1898

HOLY ALLIANCE was ratified at Paris, 26 Sept 1815, between the emperors of Russia (its originator) and Austria, and the king of Prussia, by which they ostensibly bound themselves, among other things, to be governed by Christian principles in all their political transactions, with a view to perpetuating the peace they had achieved The compact was severely censured in this country as opposed to rational liberty

HOLY PLACES IN PALESTINE These places have been a source of contention between the Greek and Latin churches for several centuries In the reign of Francis I they were placed under Latin monks, protected by the French government, but the Greeks from time to time obtained firmans from the Porte invalidating the rights of the Latins, who were at last (in 1757) expelled from the sacred buildings, which were committed to the care of the Greeks by a hatti-scherif, or imperial ordinance

The holy sepulchre partially destroyed by fire and rebuilt by the Greeks who claim additional privileges and cause fresh dissensions 1808

The Russian and French governments sent envoys (M Dashkoff and M Marcellus) to adjust the dispute an arrangement prevented by the Greek revolution 1821

The subject again agitated, and the Porte proposed that a mixed commission should adjudicate on the rival claims M Titoff, the Russian envoy acting on behalf of the Greeks and M Lavalette, the French envoy, on that of the Latins, took up the question very warmly 1850

A firman issued by the Porte, confirming and consolidating the rights previously granted to the Greek Christians, and declaring that the Latins had no right to claim exclusive possession of certain holy places specified, but permitting them to possess a key of the church at Bethlehem, &c., as in former times 9 March, 1852

The French government acquiesced with much dissatisfaction but the Russian envoy still desired the key to be withheld from the Latin monks M D'Ozeroff made a formal declaration of the right of Russia to protect the orthodox in virtue of the treaty of Kainardji in 1774, and demanded that the firman of 9 March, 1852 should be read at Jerusalem, although it militated against his pretensions, which was accordingly done The dispute still continued, the Porte being exposed to the attacks of both the Russian and French governments March, 1853

Prince Menschikoff arrives at Constantinople as envoy extraordinary, and in addition to the claims respecting the holy places, made demands respect-

ing the protection of the Greek Christians in Turkey which led to the war of 1854 6 (See *Russo Turkish War*) 28 Feb 1853

HOMILIES in early Christian times were discourses delivered by the bishop or presbyter, in a homely manner, for the common people Charlemagne's "Homiliarium" was issued 809 The Book of Homilies drawn up by abp Cranmer, and published 1547, and another prepared by an order of convocation, 1563, were ordered to be read in those churches that had not a minister able to compose proper discourses

HOMŒOPATHY, a hypothesis promulgated in his "Organon of Medicine," 1810, and in other works, by Dr Samuel Hahnemann, of Leipsic (died 2 July, 1843), according to which every medicine has a specific power of inducing a certain diseased state of the system (*similia similibus curantur*, likes are cured by likes), and if such medicine be given to a person suffering under the disease which it has a tendency to induce, such disease disappears, because two similar diseased actions cannot simultaneously subsist in the same organ *Brande*. Infinitesimal doses of medicine, such as the millionth of a grain of aloes, have been employed it is said, with efficacy The system requires the patient to regulate his diet and habits carefully It has led to a more accurate study of the materia medica Introduced into England, 1827 The Hahnemann hospital was opened in Bloomsbury-square, 16 Sept 1850 "The World's Convention of Homœopathic Physicians" opened at Philadelphia, 26 June, 1876, London School of Homœopathy, founded 15 Dec 1876 Under the heading *Odium Medicum*, many controversial letters from allopaths and homœopaths appeared in the *Times*, Jan 1888

HYDRAULIC PRESS, see under *Hydrostatics*

HYDROCHLORIC ACID or **CHLORHYDRIC ACID**, the only known compound of chlorine and hydrogen, was discovered by Dr Priestley, 1772, its constitution determined by Davy, 1810 It is also called muriatic acid and spirit of salt, see under *Alkalies*

HYDROGEN (from *hydōr*, water) Paracelsus observed a gas rise from a solution of iron in oil of vitriol about 1500, Turquet de Mayerne discovered its inflammability, 1656, as did Boyle, 1672, Lemery noticed its detonating power, 1700 In 1766 Cavendish proved it to be an elementary body, and in 1781, he and Watt first showed that in the combination of this gas with oxygen, which takes place when it is burnt, water is produced, subsequently Lavoisier decomposed water into its elements, and gave hydrogen its present name instead of "inflammable air" One volume of oxygen combines with two volumes of hydrogen to form water Hydrogen is never found in the free state

In 1877, Cailletet and Wroblewski obtained by rapid expansion of the compressed gas, a condensation or mist, which was supposed to be produced by the liquefaction of hydrogen Olszewski had seen a few drops of an unknown liquid falling in a glass tube and remaining for a few instants unevaporated, subsequently proved to be due to impurities. Prof Dewar s paper on "The Density of Hydrogen in Palladium," was published in 1873, "The Absorption of Hydrogen by Palladium at high temperatures, pressures, etc," was published in 1897 On 10 May, 1898, at the Royal Institution, he produced half a wine glassful of liquefied hydrogen at 240 deg. centigrade (below zero) in 5 min, and on the 12th he doubled the quantity On the 12th he reported it to the Royal Society, and on the 16th to the French Academy By means of this liquid he also, on the 10th, liquefied a mixture of helium and other gas or gases
Lecture on liquid hydrogen at the Royal Institution, 20 Jan. 1899, further researches, boiling point by exhaustion, 15° of absolute temperature, liquid hydrogen exhibited boiling in a vacuum tube immersed in liquid air, 21° absolute temperature, and experiments with liquid hydrogen and the vitality of seeds; see *Athenæum*, 16 Dec 1899, hydrogen obtained in the solid state by prof Dewar, 16° absolute scale, reported, Jan 1900.

HYDROGENIUM, a hypothetical metal In a paper read before the Royal Society, 7 Jan 1869, Mr Thomas Graham, master of the Mint, suggested that a piece of the metal palladium, into which hydrogen had been pressed, became an "alloy of the volatile metal hydrogenium"

HYDROGRAPH, an apparatus invented by capt Neale, for transmitting sound by water, for the purpose of signalling between ships, lighthouses, &c, it consists of a transmitter, a receiver and electric recorder, experiments were made on the Solent under the auspices of the Trinity Board — *Times*, 19 Oct 1893

HYDROGRAPHY is the description of the surface waters of the earth The first sea-chart is attributed to Henry the Navigator, in the 16th century There is a hydrographic department in the British admiralty, by which a series of charts has been issued International Hydrographic and Biological congress meets at Stockholm, 15 June, 1899 See *China*, May, 1903

HYDROMETER, the instrument by which is measured the gravity, density, and other properties of liquids The oldest mention of the hydrometer occurs in the 5th century, and may be found in the letters of Synesius to Hypatia, but it is not improbable that Archimedes was the inventor of it, though no proofs of it are to be found *Beckmann* Archimedes was killed in 212 B C, and Hypatia was torn to pieces at Alexandria, A D 415 "Hypatia," by the rev Charles Kingsley, appeared in 1853 Robert Boyle described a hydrometer in 1675 Baume's (1762) and Sykes', about 1818, have been much employed Modifications of the apparatus have been invented

HYDROPATHY, a term applied to the treatment of diseases by cold water, practised by Hippocrates in the 4th century B C, by the Arabs in the 10th century A D, and revived by Dr Currie in 1797 A system was suggested in 1825 by Vincenz Priessnitz, of Grafenberg, in Austrian Silesia The rational part of the doctrine was understood and maintained by Dr Sydenham, before 1689 Priessnitz died 26 Nov 1851

A grand hydropathic establishment at Bushey, Herts, opened, 13 Feb 1883 Many others exist throughout the kingdom

Peebles hydropathic, erected in 1878 at a cost of 100,000*l*, destroyed by fire, 7 July, 1905

HYDROPHOBIA, in man, rabies in animals, M Pasteur announced his discovery of a method of checking this disease, analogous to vaccination, the system afterwards applied to various diseases

He operates on monkeys and other animals successfully, May, on dogs, Aug 1884, on 40 persons 14 Dec 1885 An international hospital, afterwards termed the Pasteur institute, founded (40,000*l* subscribed) May, 1886, opened by president Carnot, 14 Nov 1888 Out of 726 cases treated, 4 deaths reported 12 April, 1886, 1673 persons treated, 1 May, 1888, to 1 May, 1889 The principle much opposed 1886–7 A British commission for inquiry (sir James Paget, Dr Burdon Sanderson, and others) appointed 12 April, 1886, visits Paris, and reports confidence in M Pasteur's treatment, 27 June, 1887 M Pasteur proposes and verifies other applications of his principles, 1887–8 The book, "M Pasteur, Histoire d'un Savant," was published in 1883, and an English translation by lady Claud Hamilton in 1885

Reported number of patients by M Pasteur (he died 28 Sept 1895) since 1885, 6,950, to 28 June, 1889, 1,830 patients, 7 deaths in 1889, 1,520 patients, 5 deaths, in 1895, 1,308 patients, 4 deaths in 1896, 1,521 patients, 6 deaths in 1897, 1,614 patients, 4 deaths in 1899, 1,321 patients, 8 deaths in 1901, 1,105 patients, 2 deaths in 1902

The 8th Institute in France opened at Lyons, 1 Jan. 1900, many in other countries, one at Kasauli, India, opened 1900, reported very successful, 9 Aug ,,

50,000 rupees and 10,000 rupees from sir Chas Rivas to the Indian Pasteur institute at Kasauli, also Drumbar house from the Punjaub government, and other grants, reported Sept. ,,

Meeting at the mansion house, London, to support the Pasteur institute, 1 July, above 2,000*l*. subscribed, 2 Oct. 1889, Mdme Hirsch presents 2,000,000 francs, Jan 1897 (died 2 April, 1899).

Rabies stamped out by isolation and quarantine of dogs from abroad Preventive measures, 1895 *et seq* Hydrophobia microbe discovered by prof Sormani Jan 1903

Mr J Colevin, prominent shipbuilder of Victoria (B C), dies of hydrophobia, 2 Jan 1905, from the effect of the bite of a wolf in Sept. 1904. Stated to be the first recorded case of hydrophobia in British Columbia.

INDIA COMPANY, EAST The first commercial intercourse of the English with the East Indies was a private adventure of three ships fitted out in 1591 Only one of them reached India, and, after a voyage of three years, the commander, captain Lancaster, was brought home in another ship, the sailors having seized his own, but his information gave rise to a mercantile voyage, and the establishment of a company, whose first charter, in Dec 1600, was renewed in 1609, 1657, 1661, 1693, and 1744 Its stock in 1600 consisted of 72,000*l*., when it fitted out four ships Meeting with success, it continued to trade, and India stock sold at 500*l* for a share of 100*l* in 1683 "East India," vols 1. and II 1898

A new company (the 'English) was chartered 5 Sept 1698, and the old (the "London) suspended from trading for three years the two were united 1702
New East India company established 1708
Privileges of the company continued till 1783 1744
Affairs of the company were brought before parliament, and a committee exposed a series of intrigues and crimes Aug 1772
As remedial measures two acts passed (one authorised a loan of 1,000,000*l* to the company the other celebrated as the *India bill*), effected most important changes in the constitution of the company and its relations to India A governor-general was appointed to reside in Bengal, to which the other presidencies were then made subordinate a supreme court of judicature was instituted at Calcutta the salary of the governor was fixed at 25,000*l* per year that of the council at 10,000*l*. each and of the chief judge at 8000*l*, the affairs of the company were controlled all the departments were re organised, and all the territorial correspondence was henceforth to be laid before the British ministry June, 1773
Mr Pitt's bill appointing the Board of Control (*which see*), passed 18 May, 1784
The company's charter was renewed for 20 years 1793
Trade with India thrown open 1813
Trade to China opened, Charter renewed till 1854 1833
The government of India was continued in the hands of the company till parliament should otherwise provide 1853
In consequence of the mutiny of 1857, and the disappearance of the company's army, the government of India was transferred to the crown, the Board of Control was abolished, and a Council of State for India instituted by the act 21 & 22 Vict. c 106, which received the royal assent 2 Aug * 1858

INQUISITION or **HOLY OFFICE** Previous to Constantine (306), heresy and spiritual offences were punished by excommunication only, but shortly after his death capital punishments were added, and inquisitors were appointed by Theodosius, 382 Priscillian was put to death in 384 by the emperor Maximus Justinian decreed the doctrine of the four holy synods as to the holy scriptures and their canons to be observed as laws, 529, hence the penal code against heretics About 800 the power of the western bishops was enlarged, and courts were established for trying and punishing spiritual offenders, even with death, the punishment being termed in Spain *auto-da-fe*, "an act of faith" In the 12th century many heresies arose, and during the crusades against the Albigenses, Gregory IX, in 1233, established by rules the inquisitorial missions sent out by Innocent III, 1210-15, and committed them to the Dominicans Pietro da Verona (styled Peter Martyr), the first inquisitor who burnt heretics, assassinated by an accused gonfalonier, 6 April, 1252, was canonized

INSOLVENCY The first insolvent act was passed in 1649, but it was of limited operation, a number of acts of more extensive operation were

passed at various periods, and particularly in the reign of George III The benefit of the act known as the Great Insolvent Act, was taken in England by 50,733 insolvents from the time of its passing in 1814, to March, 1827, a period of thirteen years Since then the acts relating to insolvency have been several times amended Persons not traders, or being traders whose debts are less than 300*l*, might petition the court of bankruptcy, and propose compositions, and have *pro tem* protection from all process against their persons and property, by 6 Vict c 116 (1842) In 1861, by a new bankruptcy act, the business of the insolvent debtors court was transferred to the court of bankruptcy, and a number of imprisoned debtors were released in Nov 1861 See *Bankrupts*

INSPIRATION The term used in theology, derived from the Vulgate translation of 2 Tim iii 16, to denote the influence of the Holy Spirit upon the mind of the writers of the Scriptures, "which makes these Scriptures the Word of God" Orthodox theologians all ascribe divine assistance to the writers of the books of the Old and the New Testaments, but differ as to its extent, degree, and mode of interpretation To these are opposed the theologians of the more modern school, who hold that "the Bible is the book which contains the record of God's dealings with a chosen race, and through them with mankind it is the book which contains the gospel of His Son and the lessons of salvation It is not all of the same value, it is not all written on the same level much of it is written from the imperfect moral and spiritual standpoint of times of ignorance" Others hold that the spirit, ideas, and doctrines of the Bible only are inspired, not the strict form or letter Prior to the Reformation no definite Church doctrine existed on the subject of inspiration, nor is it a doctrine of the Roman Church Calovius (1612-1686) advanced the theory, which became the accepted orthodox Protestant doctrine, "that nothing exists in the Scriptures which is not divinely suggested and inspired" This belief was expanded by the advocates of "plenary' inspiration, who asserted that every word, syllable, and letter of the Bible was inspired by God See *Higher Criticism*

INSURANCE The origin of insurance is unknown, it has, on the authority of Suetonius, been ascribed to the emperor Claudius, A D 43 Marine insurance was in use in the beginning of the 15th century, and arose from the custom of merchants insuring their vessels and goods against the perils of the sea Growing out of this form of protection to property was the insurance of the life of the merchant, who usually accompanied the ship, and of the captain of the vessel, both being liable to capture by Moorish and Turkish pirates The persons to whom the premium was paid were termed underwriters, who agreed to pay a fixed amount, the sum assured, if the person insured died within a year, the document specifying the contract was called the policy, the name it still bears The premium charged appears to have been not less than 5 per cent of the sum assured, irrespective of the age of the insurer In 1574, Robert Chandler, under a patent granted to him by queen Elizabeth, established a chamber of insurance in London to regulate all contracts of insurance This chamber was destroyed by the great fire of 1666 The earliest *life* policy of which particulars have been preserved was issued 15 June, 1583, at the "Office of Insurance, within the Royal Exchange, London" This policy gave rise to the first authenticated disputed claim It provided that if a certain William Gybbons should die within twelve months the underwriters, thirteen in number, who guaranteed sums from 25*l* to 50*l* each, should pay to Richard Martin 383*l* 6*s* 8*d*, the premium for which was 8 per cent Gybbons died 28 May, 1584, and the underwriters refused to pay on the ground that he had survived twelve months of 28 days each The commissioners appointed to determine such cases decided that the twelve months mentioned in the policy meant a calendar year, and ordered payment to be made by the underwriters, on appeal to the court of admiralty, the decision of the commissioners was upheld, 1587 Life insurance as a provision for a wife and children is mentioned in 1622 Policies as collateral security for money advanced for the purchase of appointments were much in vogue in the 17th and 18th centuries The earliest known life insurance office, named the "Society of Assurance for Widows and Orphans," was established in 1699, and was of the nature of an assessment company, up to this date life insurances were underwritten In principle it was to consist of 2,000 members, who were to contribute 5*s* each on entry, to pay for the first claim, and the same sum on each subsequent death among the members, 500*l* being thus provided for the widow and children The society came to an end in 1712 "The Amicable" was started in 1705, and received its charter from queen Anne, 25 July, 1706, the number of its members was to be 2,000, each paying 10*s* entrance fee, and an annual subscription of 6*l* 4*s* Amongst the representatives of those who died in the first year one-sixth of the contributions were to be divided, one-third the second year, and proportionately until in the fifth and all subsequent years five sixths of the contributions were to be divided, the remainder, with all profits made by the sale of annuities, being accumulated as a reserve fund In 1807, the contribution was made to vary with the age of entry The Amicable existed as an independent institution until 1866, when it was transferred to the Norwich Union Life Insurance Society, its policies being finally merged, 30 June, 1886, with those of the Norwich Union Numerous life offices of the assessment type came into existence shortly after the foundation of the Amicable, all of which, except the Amicable, collapsed at the bursting of the South Sea Bubble, 1720 The London Assurance Corporation and the Royal Exchange Assurance Corporation, chartered in 1720, received additional powers authorising them to transact life business, these two institutions are now the oldest life offices extant The Equitable, founded 1760, was the first life insurance office to transact its business on a scientific basis, by fixing the sum assured and the premium at the time of making the assurance, securing at death the payment of a definite sum, the rate of premium being

regulated by the age at entry Owing to the Northampton tables of mortality, which overestimated the death-rate percentage, having been used as the basis of calculation, a surplus accumulated After paying claims and expenses and providing a reserve fund, this sum was distributed among the assured, and is the origin of the system of *bonuses* The practice of insuring lives as a speculation was put down by the Gambling Act of 1774, which made it illegal to effect an insurance on the life of any person, unless the insurer had pecuniary interest in the life insured In the 19th century the number of companies rapidly increased, reaching a total of 113 in 1870, insuring 329,000,000*l*, under 638,000 policies, with funds against liabilities amounting to 92,000,000*l*, with an annual premium income of 9,500,000*l* The reckless amalgamation of companies prior to 1870 led to disastrous results in the case of the Albert and the European companies, the former of which absorbed 26, the latter 40 other offices, the Albert failing for 8,000,000*l* The Life Assurance Companies Act, 1870, passed to protect the public against unsound companies, requires each office to publish a statement of its affairs in the form of an annual balance sheet, and a periodical valuation of its liabilities and assets, the sum of 20,000*l* must also be deposited with the board of trade by every new company as a guarantee to its policy holders A scheme for effecting life insurances through the medium of the post office was inaugurated in 1864, the amount insured being not less than 5*l* nor more than 100*l* for either sex between the ages of 14 and 65, and 5*l* on children between 8 and 14 years *Industrial* insurance is carried on to a large extent in life policies of small amount, the premiums varying from ½*d* to 6*d* per week, the Prudential, founded 1848, which has a very extensive business of this class, is the largest office of the kind, its funds exceeding 50,000,000*l* An early attempt to *guarantee fidelity* of employés by insurance was made in 1720 The first fidelity office, The Guarantee Society, was established in 1840, the Provident Clerks Guarantee in 1865, the Law Guarantee and Trust in 1888 Among the developments of modern life assurance are endowment policies, policies at reduced and modified premiums, insurance without medical examination, instituted by the Sun Office in 1900, and since adopted by other companies, annuities, partnership policies, policies as trusts for married women in connection with the Married Women's Property Acts of 1870 and 1882, and the Married Women's Policies Insurance (Scotland) Act of 1880, insurances for special classes, as the Clergy Mutual, founded in 1829, the University, 1825, the Scottish Temperance, 1883, the United Kingdom Temperance, 1840, and the Abstainers and General, 1883, which grants special advantages to vegetarians Insurance against *accident* has largely increased as a result of the Workmen's Compensation Acts, 1897 and 1900 The *coupon* system entitles persons travelling who possess copies of specified newspapers, diaries, railway guides, &c, containing accident coupons, to the payment of certain sums for injuries specified *Special risks* are provided against by insurances effected with various offices, such as the National Burglary Insurance Company, 1892, which issues a combined burglary and fire policy, as well as special policies for licensed victuallers, cyclists, and the army, school epidemics can also be insured against in certain offices The first *Mortality Table* was prepared by Halley astronomer-royal of England, 1693, the first table of premiums used by the Equitable Society was prepared from the mortality of the year 1741 by John Dodson, author of the "Mathematical Repository," who, with Robert Simpson, was the founder of that society, which later adopted the "Northampton" tables, constructed by Dr Price from statistics of the parish of All Saints, Northampton, from 1735-80 Joshua Milne, actuary to the Sun Office, constructed the "Carlisle" table, based on the population of the parishes of St Mary and St Cuthbert, Carlisle, in 1780 and 1787 The Equitable assurance table was compiled by Griffith Davies, F R S, 1825 In 1843, a committee of actuaries collected the data of 17 insurance companies, and published the result of their investigations in 1843 The Institute of Actuaries, founded in 1848 (incorporated by royal charter in 1884), published in 1869 a table compiled on the basis of the experience of 21 insurance companies, tables deduced from these results by Dr Sprague were published in 1882 A vast business in life insurance is transacted in the *United States*, the Mutual Insurance Company of New York being the largest in the world A feature in American insurance is the tontine system (*which see*), which is in extensive operation Insurance offices are under state control, and are required to maintain a standard of solvency, the company being compelled to close if its assets are not sufficient to meet its liabilities according to the legal estimate *Fire Insurance* appears to have had its origin in Anglo-Saxon times in connection with the guilds, the extant rules of some of these specifying that in consideration of certain contributions, the members guaranteed each other against loss by fire, water, robbery, and other contingencies The oldest fire insurance in existence is the Sun, founded in 1710 See also *Lloyd's* and *Tontine*

INTERDICT or ECCLESIASTICAL CENSURE, seldom decreed in Europe till the time of *Gregory VII 1073, but often afterwards.* When a prince was excommunicated, all his subjects retaining their allegiance were excommunicated also, and the clergy were forbidden to perform any part of divine service, or any clerical duties, save the baptism of infants, and taking the confessions of dying penitents In 1170, pope Alexander put all England under an interdict, and when king John was excommunicated in 1208, the kingdom lay under a papal interdict for six years England was put under an interdict, on Henry VIII shaking off the pope's supremacy, 1535, and pope Sixtus V published a crusade against queen Elizabeth of England in 1588, see *Excommunication*

INTEREST, see *Usury* The word interest was first used in an act of parliament of the 21st James I 1623, wherein it was made to signify a lawful increase by way of compensation for the use of money lent The rate fixed by the act was 8*l* for the use of 100*l* for a year, in place of usury at 10*l* before taken The Commonwealth lowered the rate to 6*l* in 1651, confirmed in 1660, and by an act of the 13th of queen Anne, 1713, it was reduced to 5*l* The restraint being found prejudicial to commerce was somewhat relaxed in 1839, and was totally removed by 17 & 18 Vict c 90 (1854)

IRRIGATION, practised in the east and in Egypt from the most remote ages It was strenuously advocated for India by sir A Cotton and others at the Social Science Congress at Manchester, Oct 1866 In 1865 acts were passed for utilising London sewage in the irrigation of grass land, and the results are said to be generally favourable The subject was much discussed, Aug 1873 A method of producing artificial rain from ponds by means of steam-power, patented by Isaac Brown, of Edinburgh, was tried by Mr Coleman, at Stoke Park, and reported successful see *Sewage*, and *Intermittent Filtration*, *Madras* (1895), *Egypt*, *Nile*

* The following conjectures have been made as to his identity An Armenian patriarch forcibly carried from Constantinople (who died ten years before the mask) the duc de Vermandois son of Louis XIV reported to have perished in the camp before Dixmude the duc de Beaufort, whose head is reported to have been taken off before Candia James, duke of Monmouth, executed on Tower-hill, a son of Anne of Austria, queen of Louis XIII, either by cardinal Mazarin or by the duke of Buckingham the twin brother of Louis XIV (a conjecture received by Voltaire and others) Fouequet, an eminent statesman in the time of Louis XIV and a count Matthioli, secretary of state to Charles III, duke of Mantua. M Delort and the right hon Agar Ellis (afterwards lord Dover) endeavoured to prove Matthioli to have been the person The mask, it seems, was not made of iron but of black velvet, strengthened with whalebone, and fastened behind the head with a padlock.

JURIDICAL SOCIETY was established in Feb 1855, and opened with an address by sir R Bethell on 12 May following

JURIES Trial by jury was introduced into England during the Saxon heptarchy, mention being made of six Welsh and six Anglo-Saxon freemen appointed to try causes between the English and Welsh men of property, and made responsible, with their whole estates real and personal, for false verdicts *Lambard* By most authorities their institution is ascribed to Alfred about 886, which is not historical In *Magna Charta*, juries are insisted on as the great bulwark of the people's liberty When either party is an alien born, the jury shall be one half denizens, and the other half aliens, stat 28 Edw III 1353 By the common law a prisoner upon indictment or appeal might challenge peremptorily thirty-five, being under three juries, but a lord of parliament, and a peer of the realm, who is to be tried by his peers, cannot challenge any of his peers An act for the trial by jury in civil cases in Scotland was passed in 1815 An act to consolidate and amend the laws relating to juries in Ireland was passed 4 Will IV 1833 A new act respecting juries, regulating their payment, &c, was passed 9 Aug 1870 The clause respecting their payment was rescinded by act passed 28 Feb 1871 Laws respecting juries in Ireland amended, 14 Aug, 1871 New Juries bill brought in by the attorney-general, sir John Coleridge, Feb 1873 Special juries bill passed, May, 1898 Juries are summoned to assist the coroner in investigating the causes of sudden or violent death —GRAND JURIES (of not less than 12 or more than 23 persons), decide whether sufficient evidence is adduced to put the accused on trial —The constitution of 1791 established the trial by jury in France —An imperial decree abolished trial by jury throughout the Austrian empire, 15 Jan 1852 —Trial by jury began in Russia, 8 Aug 1866; in Spain, 1889—A true bill for libel granted against alderman sir F Truscott in his absence, who was honourably acquitted, 18 Sept. 1879

COERCION OF JURIES —It is said that in early times the suitors used to feed the jury empanelled in

their action, and hence arose the common law of denying sustenance to a jury after the hearing of the evidence A jury may be detained during the pleasure of the judge if they cannot agree upon a verdict and may be confined without meat, drink, or fire, candle light excepted, till they are unanimous —Some jurors have been fined for having fruit in their pockets when they were withdrawn to consider of their verdict, though they did not eat it. *Leon Dyer*, 137 A jury at Sudbury not being able to agree, and having been some time under duress, forcibly broke from the court where they were locked up, and went home, 9 Oct. 1791 *Phillips* In Scotland, Guernsey, Jersey, and France, juries decide by a majority in France, since 1831, a majority of two thirds is required.

"JUSTE MILIEU" (moderation and conciliation to parties), according to Louis-Philippe (in 1830), is the only principle of government which can secure the welfare of France

JUSTICE GENERAL, LORD, Scotland, see *Court of Session*

JUSTICES OF THE PEACE are unpaid local magistrates, invested with extensive powers in minor cases, but subject to supersession and punishment by the King's Bench for an abuse of their authority They were first nominated by William I in 1076 *Stou* Persons termed conservators of the peace in each county were appointed by 1 Edw III c 2, 1327, and their duties were defined in 1360 The form of a commission of the peace settled by the judges, 23 Eliz 1580 *Hawkins*, see *Eyre*

JUSTICES, LORDS, were appointed by English sovereigns to govern during their absence, especially by William III, George I and George II (1695-1760) George III never left England In Sept 1821, when George IV went to Hanover, lords justices were appointed, the duke of York being the first No such appointment was made during the reign of queen Victoria, it having been decided by the law authorities in 1843 to be unnecessary when the queen went to France Ireland is always ruled by lords justices when the lord-lieutenant is out of the country, or his office is vacant —Two *lords justices of the court of appeal in chancery*, having rank next after the chief baron of the exchequer, were appointed from 1 Oct 1851, salary 6000*l* For recent changes see *Appeal* and *King's Bench*

JUSTICIARS In ancient times the kings of England used to hear and determine causes, but it is declared by law that if the king cannot determine every controversy, he, to ease himself, may divide the labour among persons, men of wisdom and fearing God, and out of such to appoint judges The Saxon kings of England appointed a judge after this manner, who was, in fact, the king's deputy After the Norman conquest, the person invested with that power had the style of *Capitalis Justiciæ*, or *Justiciarius Angliæ* These judges continued until the erection of the courts of king's bench and the common pleas The first justiciars of England were Odo, bishop of Bayeux, and William Fitz-Osborne, in 1067, and the last was Philip Basset, in 1261, or Hugh le Despencer, 1263 (Henry III) Authorities vary

FEMALE KNIGHTS It is said that the first were the women who preserved Tortosa from the Moors in 1149, by their stout resistance Large immunities were granted to the women and their descendants Several female orders appear in the preceding list. Ladies have been admitted to several male orders

KNIGHTS OF GLYN and KERRY IN IRELAND The heads of two branches of the family of Fitzgerald, who still enjoy the distinctions bestowed on their ancestors by sovereigns in the 13th century The 19th knight of Kerry died 6th Aug 1880.

KNIGHTS OF THE SHIRE, or OF PARLIAMENT, summoned by the king's writ and chosen by the freeholders, first summoned by Simon de Montfort, in 1258, and in a more formal manner, 20 Jan 1265 There are writs extant as far back as 11 Edward I., 1283 The knights are still girded with a sword when elected, as the writ prescribes

KNIGHTS OF LABOUR A large secret trade union in the United States, said to have been originated by a man named Uriah Stevens in Philadelphia in 1869, for protection of workmen against capitalists They were energetic in the promotion of railway and other strikes, especially in Missouri in March, 1886 Head quarters at Philadelphia, number about 400,000, May, 1886 The society is condemned by the pope Decline of the order reported Aug 1888, active in Aug 1890 *Knights of Industry* active in regard to strikes, 1893

KNIVES. In England, Hallamshire (the country round Sheffield) has been renowned for its cutlery for five centuries, Chaucer speaks of the "Sheffield thwytel" Stow says that Richard Mathews on the Fleet-bridge was the first Englishman who made *fine* knives, &c, and that he obtained a prohibition of foreign ones, 1563 Clasp or spring knives became common about 1650, coming originally from Flanders.—*Knife cleaning machines* were patented by Mr George Kent in 1844 and 1852, others have been invented, by Masters, Price, &c, see *Forks*

KNOW-NOTHINGS, a society which arose in 1853, in the United States of N America Their principles were embodied in the following propositions (at New York, 1855) They possessed several newspapers and had much political influence —

1 The Americans shall rule America.
2 The Union of these States
3 No North, no South, no East, no West.
4. The United States of America—as they are—one and inseparable
5 No sectarian interferences in our legislation or in the administration of American law
6 Hostility to the assumption of the pope, through the bishops, &c., in a republic sanctified by Protestant blood
7 Thorough reform in the naturalisation laws
8 Free and liberal educational institutions for all sects and classes, with the Bible, God's holy word, as a universal text-book

A society was formed in 1855 in opposition to the above, called *Know Somethings* Both bodies were absorbed into the two parties, Democrats and Republicans, at the presidential election in Nov 1856.

LATIN UNION (Monetary), that of France, Italy, Belgium, and Switzerland, to maintain the use of the same coinage, from 1865 *et seq*, re-constituted in 1885, arranged to be continued from year to year, autumn 1889, renewed till 31 Dec 1893, Oct 1891, conference at Paris, 9 Oct 1893

LATITAT, an ancient writ, directing the sheriff to apprehend persons to be brought before the king's bench court, had its name from its being supposed that the person was lying hid, and could not be found in the county to be taken by bill The writ was abolished by the Uniformity of Process act, 23 May, 1832

LATITUDE. First determined by Hipparchus of Nice, about 162 B C It is the extent of the earth or the heavens, reckoned from the equator to either pole Maupertuis, in 1737, in latitude 66 20 measured a degree of latitude, and made it 69 493 miles. Swanberg, in 1803, made it 69 292 At the equator, in 1744, four astronomers made it 68 732, and Lambton, in latitude 12, made it 68 743 Mudge, in England, made it 69·148 Cassini, in France, in 1718 and 1740, made it 69·172, and Biot, 68 769; while a recent measurement in Spain makes it but 68·63—less than at the equator, and contradicts all others, proving the earth to be an oblate spheroid (which was the opinion of Cassini, Bernouilli, Euler, and others), instead of a prolate spheroid, see *Longitude*

LATITUDINARIANS, a name given to certain theologians who endeavoured to reconcile the church and nonconformists in the 17th century, such as Hales, Chillingworth, Tillotson, and Burnet

LEAP-YEAR or **BISSEXTILE**, originated with the astronomers of Julius Cæsar, 46 B C They fixed the solar year at 365 days, 6 hours, comprising, as they thought, the period from one vernal equinox to another, the six hours were set aside, and at the end of four years, forming a day, the fourth year was made to consist of 366 days The day thus added was called intercalary, and was placed a day before the 24th of February, the sixth of the calends, which was reckoned *twice*, hence called *bissextile* or *twice sixth* This added day with us is Feb 29th, see *Calendar* This arrangement makes the year nearly three minutes longer than the astronomical year to obviate this, 1700, 1800, and 1900 were not leap-years, but 2000 will be one, see *Calendar* and *Year*

LEARNING AND THE ARTS flourished among the Greeks, under Pisistratus, 537 B C, and especially under Pericles, 444 B C., and with the Romans at the commencement of the Christian era, under Augustus. LEVANT (the East), a term applied to Greece, Turkey, Asia Minor, &c Levant companies, in London, were established in 1581, 1593, and 1605

LEVELLERS, a fanatical party in Germany, headed by Muncer and Storck in the 16th century, who taught that all distinctions of rank were usurpations on the rights of mankind At the head of 40,000 men, Muncer commanded the sovereign princes of Germany and the magistrates of cities to resign their authority, and on his march his followers ravaged the country The landgrave of Hesse at length defeated him at Frankenhausen, 15 May, 1525, 7000 of the enthusiasts fell in the battle, and the rest fled, their leader was taken and beheaded at Mulhausen The English "Levellers," powerful in parliament in 1647, were put down by Cromwell in 1649, and their leader Lilburn was tried and acquitted At the period of the French revolution some Levellers appeared in England A "Loyal Association" was formed against them by John Reeves, Nov. 1792

LEVELS The great Level of the Fens is a low-lying district of about 2000 square miles, in Lincolnshire, Huntingdonshire, Cambridgeshire, and Norfolk, said to have been overflowed by the sea during an earthquake, 368 It was long afterwards an inland sea in winter, and a noxious swamp in summer, and was gradually drained—by the Romans, the Saxons, and especially by the monks during the reigns of the Plantagenet kings One of the first works on a large scale was carried out by Morton, bishop of Ely, in the reign of Henry VII A general drainage act was passed by the advice of lord Burghley, in 1601, but little work was done till the reign of James I., who, in 1621, invited over the great Dutch engineer, Cornelius Vermuyden, to assist in the general drainage of the country After completing several great works, Vermuyden agreed (in 1629) to drain the "Great Level" He was at first prevented from proceeding with his undertaking through a popular outcry against foreigners, but eventually, aided by Francis, earl of Bedford, in spite of the great opposition of the people, for whose benefit he was labouring, he declared his great work complete in 1652 He also reclaimed much valuable land at Axholme, in Lincolnshire, 1626-30, and many Dutch and French protestants settled here about 1634, and a few of their descendants still remain.—There are the Middle, Bedford, South, and North Levels.

The drainage of the Great Level employed the talents of Rennie (about 1807), and of Telford (1822), and of other eminent engineers		
The Middle Level commission cut through certain barrier banks, and replaced them by other works		1844

LICHFIELD (Staffordshire) The see of Mercia (at Lichfield) was founded about 656, removed to Chester, 1075, to Coventry, 1102 In 1121 Robert Peche was consecrated bishop of Lichfield and Coventry By an order in council, Jan 1837, the archdeaconry of Coventry was added to the see of Worcester, and Dr Samuel Butler became bishop of Lichfield This see has given three saints to the Romish church, and to the British nation one lord chancellor and three lord treasurers It is valued in the king's books at 559*l* 18*s* 2*d* Present income, 4,200*l* Population, 1881, 8,349, 1891, 7,864, 1901, 7 902

Lichfield cathedral was first built about 656 the present structure was founded by Roger de Clinton, the 37th bishop, in 1148 Walter de Langton (bishop in 1296), built the chapel of St Mary, now taken into the choir, and under bishop Heyworth (1420) the cathedral was perfected The building was despoiled at the Reformation, and was scandalously injured in the parliamentary war (when its monuments, its fine sculptures, and beautifully painted windows, were demolished). It was repaired at the restoration, 1660, in 1788, and by Gilbert G Scott, 1860-63 and 1884.

In Lichfield castle, king Richard II kept his Christmas festival, 1397, when 200 tuns of wine and 2000 oxen were consumed. A charter was granted to Lichfield, constituting it a city, by Edward VI, 1549. It was absorbed into the county in 1885.

LIGHT The law of refraction discovered by Snellius, about 1624 The motion and velocity of light discovered by Reaumur, and after him by Cassini, and calculated by Rœmer (1676) and Bradley (1720) Its velocity ascertained to be about 190,000,000 of miles in sixteen minutes, or nearly 200,000 miles in a second, which is a million of times swifter than the velocity of a cannon ball, about 1667 The light of the sun takes eight minutes and eight seconds for its transmission through space to the earth See *Emission Theory* The undulatory theory of light, its polarisation, and its chemical action, were all made known in the nineteenth century by Dr Thos Young, Weber, Fresnel, Malus, Arago, Biot, Brewster, Wheatstone, Ritter, Niepce, Daguerre, Talbot, Stokes, Tyndall, Rayleigh, Dewar, Crookes, &c, see *Optics*, *Photography*, *Calorescence*, *Fluorescence*, *Röntgen Rays*, *Radium*.
Velocity of Light Direct determination by the toothed wheel method by Fizeau agreed with the astronomical result 1849
Foucault, with the revolving mirror, gave 298,000 kilometres in a second of mean time 1865
Cornu's improved tooth wheel apparatus gave 300,400 kilometres in a second of mean time 1874
Professor Simon Newcomb, of Washington, with his "phototachometer" (completed in May, 1880) gave 299,860 kilometres in a second of mean time, 1886
Mr (aft. sir) Wm Crookes, F R S, considered that he had demonstrated the mechanical action of light by experiments with delicate balances in the highest procurable vacuum, and calculated the force of the sun's rays upon the earth to be 2 3 tons to the square mile, 1873 6 His apparatus was termed *Radiometer* (*which see*) After much investigation, Mr Crookes admitted that the action was not due to radiation, but to difference of heat-absorption and the reaction of residual air
Mr Crookes at the Royal Society announces experiments respecting an ultra gaseous state of matter, supporting the emission theory . . . 5 Dec. 1878
Dr C Wm Siemens reported to the Royal Society that the electric light acts on vegetation like solar light . 4 Dec 1880

LIGHTHOUSE, called Pharos (now *phare*, French, *faro*, Italian), from one erected at Pharos, (*which see*) near Alexandria, Egypt, 550 feet high, said to have been visible forty-two miles, about 283 B C There was one at Messina, at Rhodes, &c The light was obtained by fires A coal-fire light was exhibited at Tynemouth castle, Northumberland, about 1638 The first true lighthouse erected in England was the Eddystone lighthouse (*which see*) in 1758-60 Lights were exhibited in various places by the corporation of the Trinity-house early in the 16th century 2814 lighthouses in the world (1867)

BRITISH LIGHTHOUSES

The lighthouse (40 years old, height 80 feet, weight 300 tons) on the pier at Sunderland, Durham, was moved forward 500 feet without stopping the illumination, under the superintendence of Mr John Murray, October, 1841
The Commissioners on Lights, &c. (1861) report 171 shorelights in England, 113 in Scotland, and 73 in Ireland (total, 357) and 47 floating-lights
The French have 224 lighthouses on shore
The source of light in our lighthouses is principally oil but in harbour lights gas has been successfully used Glass reflectors were used in 1780, and copper ones in 1807 A common coal fire light was discontinued at St. Bees in 1822 Fresnel's Dioptric system (*which see*), devised about 1819, was adopted for the first time in England by Messrs Wilkins, at the direction of the corporation of the Trinity-house, 1 July, 1836
The most brilliant artificial light ever produced—derived from magneto-electricity by a machine devised by professor Holmes—was first employed at the South Foreland lighthouse, near Dover, on 8 Dec 1858 and at Dungeness in 1862 Mr Holmes arrangement, and a similar one constructed by M Serin, were shown at the International exhibition, London, in 1862

LIGHTING UP (Towns, &c), see *London*, 1584, 1694, *Gas* and *Electric Light*

LIGHTNING-CONDUCTORS were first set up for the protection of buildings by Franklin shortly after 1752, when he brought down electricity from a thunder-cloud Richmann, of St Petersburg, was killed while repeating these experiments, Aug 1752. The first conductor in England was set up at Payne's Hill, by Dr Watson In 1766 one was placed on the tower of St Mark, at Venice, which has since escaped injury, although frequently injured by lightning previously A powder magazine at Glogau, in Silesia, was saved by a conductor in 1782, and, from the want of one, a quantity of gunpowder was ignited at Brescia in 1767, and above 3000 persons perished In 1762, Dr Watson recommended conductors to be used in the navy, and they were employed for a short time, but soon fell into disuse from want of skill and attention Mr (afterwards sir William) Snow Harris devoted his attention to the subject from 1820 to 1854, and published a work, in 1843, detailing his experiments In 1830, above thirty ships were fitted up with his conductors, and in 1842 his plans were adopted, and his conductors are now manufactured in the royal dockyards. In 1854 parliament granted him 5000*l* A lightning research committee formed, Jan 1901, with a view to the better protection of buildings, 200 observers in the United Kingdom, and others abroad. 713 deaths by lightning in the United States in 1900 (291 in the open, 57 under trees, 158 in houses)

LIGHT SHIPS, floating beacons guarding dangerous sandbanks and shoals Those round the English coast are under the control of Trinity-house The first English light vessel was placed at the Nore in 1825, and there were 52 in position off the coast of England in December, 1905 There is only one light vessel on the Scottish coast under the control of the Northern lighthouse board, 84 George-street, Edinburgh It is the North Carr established in 1887

LIMA (Peru) In 1534, Pizarro, marching through Peru, was struck with the beauty of the valley of Rimac, and there he founded this city, and gave it the name of *Ciudad de los Reyes*, or city of the kings, 1535 Here he was assassinated, 26 June, 1541 Awful earthquakes occurred here, 1586, 1630, 1687, and 28 Oct 1746 In 1854-5, thousands perished by yellow fever Mr Sullivan, the British consul, was assassinated at Lima, 11 Aug 1857, see *Peru*, 1872, 1881-3 Buildings injured by an earthquake, 20 Sept 1897 The church of San Francisco, founded by Pizarro, 1535, burnt, 20 Sept 1899 Earthquake, the most violent experienced for 30 years, causes great damage, 4 Mar 1904 Population, 1900, 105,000

LIMBURG (Netherlands), a duchy in the 10th century, acquired by the dukes of Brabant about 1288, added to Burgundy about 1429, passed to the house of Austria in 1477, became one of the United Provinces, 1609, conquered and annexed to the French republic, 1795, restored to the Netherlands, 1814, divided between Holland and Belgium, 1830, completely separated from the German confederation by treaty, 11 May, 1867

LIME or LINDEN TREE, probably introduced in the 16th century The limes in St. James's park are said to have been planted at the suggestion of Evelyn, who recommended multiplying odoriferous trees, in his "Fumifugium" (1661). A lime-tree planted in Switzerland in 1414, existed in 1720, the trunk being thirty-six feet in circumference

LIME-LIGHT, produced by the combustion of oxygen and hydrogen or carburetted hydrogen on a surface of lime. This light evolves little heat and does not vitiate the air. It is also called Drummond Light, after its inventor, lieut. Thomas Drummond, who successfully produced it as a first-class light in 1826, and employed it on the ordnance survey. LITTLE ENGLANDISM, a term defined by sir Edward Grey as an *aimless antipathy to the British Empire*, *Times*, 18 July, 1901

LITURGIES (from the Greek *leitos*, public, and *ergon*, work) The Greek and Roman liturgies are very ancient, having been committed to writing about the 4th and 5th centuries The Romish church recognises four the Roman or Gregorian, the Ambrosian, the Gallican, and the Spanish or Mosarabic The Greek church has two principal liturgies St Chrysostom's and St Basil's, and several smaller ones Parts of these liturgies are attributed to the Apostles, to St Ignatius, 250, to St Ambrose (died 397), and to St Jerome (died 420)

The present English Liturgy was first composed, and was approved and confirmed by parliament, in 1547-8 The offices for morning and evening prayer were then put into nearly the same form in which we now have them, and published 1549 and 1552

At the solicitation of Calvin and others, the liturgy was reviewed and altered 1551

It was first read in Ireland, in the English language, in 1550, and in Scotland, where it occasioned a tumult, in 1637, and was withdrawn 1638

The liturgy was revised by Whitehead, formerly chaplain to Anne Boleyn, and by bishops Parker, Grindall, Cox, and Pilkington, dean May, and secretary Smith

John Knox is said to have used a liturgy for several years The rev Robert Lee, of Edinburgh, introduced a form of prayer in public worship, but gave it up when ordered to discontinue it in May, 1859 he soon after resumed it and the discussion on the subject ceased only at his death, 14 March, 1868

LOLLARDS (by some derived from the German *lollen*, to sing in a low tone, by others derived from the English verb to loll or lounge), the name given to the first reformers of the Roman catholic religion in England, the followers of Wykliffe The sect is also said to have been founded in 1315 by Walter Lollard, who was burnt for heresy at Cologne in 1322. The Lollards are said to have devoted themselves to acts of mercy The first Lollard martyr in England was William Sawtree, parish priest of St. Osith, London, 12 Feb 1401, when the Lollards were proscribed by parliament, and numbers of them were burnt alive Sir John Cobham, lord Oldcastle, a follower of Wykliffe, was accused of treason and condemned, Sept 1413 He escaped to Wales, where he was captured, and brought to London and burnt, 25 Dec 1418 Lollards' tower, part of the bishop's prison, was near St Paul's *Dr Maitland*

LOMBARDISTS, disciples of Peter Lombard, the schoolman, bishop of Paris, author of the "Book of Sentences," who died in 1164.

LOMBARD MERCHANTS, in England, were understood to be composed of natives of some one of the four republics of Genoa, Lucca, Florence, or Venice *Anderson* Lombard usurers were sent to England by pope Gregory IX to lend money to convents, communities, and private persons who were not able to pay down the tenths which were collected throughout the kingdom with great rigour that year, 13 Hen III 1299 They had offices in the street named after them to this day Their usurious transactions caused their expulsion from the kingdom in the reign of Elizabeth

LOMBARDY (N Italy) derived its name from the Longobardi, a German tribe from Brandenburg, said (doubtfully) to have been invited into Italy by Justinian to serve against the Goths Their chief, Alboin, established a kingdom which lasted from 568 to 774 The last king, Desiderius, was dethroned by Charlemagne (For a list of the Lombard kings, see *Italy*) About the end of the 9th century the chief towns of Lombardy fortified themselves, and became republics The first *Lombard league*, consisting of Milan, Venice, Pavia, Modena, &c, was formed to restrain the power of the German emperors, in 1167 On 29 May, 1176, they defeated the emperor Frederick Barbarossa at Legnano, and eventually compelled him to sign the peace of Constance in 1183 In 1226 another *league* was formed against Frederick II, which was also successful After this, petty tyrants rose in most of the cities, and foreign influence quickly followed The Guelf and Ghibelline factions greatly distracted Lombardy, and from the 15th century to the present time, it has been contended for by the German and French sovereigns The house of Austria obtained it in 1748, and held it till 1797, when it was conquered by the French, who incorporated it with the Cisalpine republic, and in 1805 with the kingdom of Italy On the breaking up of the French empire in 1815, the LOMBARDO-VENETIAN KINGDOM was established by the allied sovereigns and given to Austria, who had lost her Flemish possessions. Lombardy and Venice revolted, and joined the king of Sardinia in March, 1848, but they did not support him well, and were again subjected to Austria after his defeat at Novara, 23 March, 1849. An amnesty for political offences was granted in 1856 Great jealousy of Sardinia was felt by Austria after 1849 In 1857 diplomatic relations were suspended, and in April, 1859, war broke out, the Austrians crossing the Ticino and entering Piedmont The French emperor declared war against Austria, and immediately sent troops into Italy The Austrians were defeated at Montebello, 20 May, Palestro, 30, 31 May, Magenta, 4 June, and Solferino, 24 June. By the peace of Villafranca (11 July), the largest part of Lombardy was ceded to Louis Napoleon, who transferred it to the king of Sardinia It now forms part of the kingdom of Italy, to which Venetia was also surrendered by the treaty of Vienna, 3 Oct 1867 Population, 1890, 3,906,958, 1901, 4,278,188

The town appears to have prospered under British, Roman, and Saxon rules, and to have been much indebted to Alfred and his successors, but suffered greatly by the Danes, it was not attacked by William I, by whom the citizens were conciliated, and its corporate government was recognized by his son Henry I The city received many favours from the Plantagenet kings, but frequently resisted their exactions London is governed by the lord mayor, the court of aldermen, the common council, and other offices London was not included in the Municipal Corporations act, 1835. The London county council was constituted by the Local Government act passed in 1888.

* This terrible pestilence broke out in India, and spreading itself westward through every country on the globe, reached England. Its ravages in London were so great that the common cemeteries were not sufficient for the interment of the dead, and various pieces of ground without the walls were assigned for burial-places. Amongst these was the waste land now forming the precincts of the Charter house where upwards of 50,000 bodies were then deposited This disorder did not subside till 1357 *Leigh*.

† This proclamation or decree was dated from Nonesuch, 7 July, 1580, and it was forbidden to erect new buildings where none had before existed in the memory of man. The extension of the metropolis was deemed calculated to encourage the increase of the plague, create a trouble in governing such multitudes a dearth of victuals, multiplying of beggars, and inability to relieve them an increase of artisans more than could live together impoverishing other cities for lack of inhabitants. The decree stated that lack of air, lack of room to walk and shoot, &c., arose out of too crowded a city A proclamation to the same effect was also issued by James I

TREATMENT OF THE INSANE.

Till the end of the last century lunatics were treated with cruel severity, see Conolly "On the Treatment of the Insane," 1856.

The insane were exhibited at Bethlem as a show, for 1d. or 2d till 1770
Enlightened principles of treatment were introduced by Wm. Tuke, at the Society of Friends' "Retreat," at York, and by Pinel, at the Bicêtre, Paris, with very great success 1792
Esquirol succeeds Pinel, and strongly recommends instruction in the management of mental disorders 1810
Exposure of enormous cruelties in the Bethlem hospital 1815
This led to gradual improvements, and at last to the total abolition of mechanical restraints at Lincoln, 1837 and at Hanwell Asylum (under the superintendence of Dr John Conolly) and at other places 1839

MAGDALA, a very strong place in Abyssinia (*which see*). On Good Friday, 10 April, 1868, the troops of the emperor Theodore attacked the first brigade of the British army under sir Robert Napier, and were repulsed with great slaughter On the next day all the European prisoners were given up, but Theodore himself refused to surrender, and on Easter Monday, 13 April, Magdala was stormed, and Theodore himself killed—it is said by his own hand.—British loss, 2 killed; 20 wounded · Abyssinian loss, about 400 killed and wounded out of about 5000. Magdala was burnt to the ground by the British, 17 April, 1868.

MAGDALENS AND MAGDALENETTES, communities of nuns The order of penitents of St Magdalen was founded 1272, at Marseilles The convent of Naples was endowed by queen Sancha, 1324 That at Metz was instituted in 1452 At Paris, 1492 The Magdalen at Rome was endowed by pope Leo X, in 1515, and favoured by Clement VIII in 1594 The Magdalen hospital, London, was founded in 1758, under the direction of Dr Dodd The asylum in Dublin was opened in June, 1766.

MAGDEBURG (Prussia) The archbishopric was founded about 967 The city suffered much during the religious wars in Germany It was besieged and taken by the elector Maurice, Nov 1550, and Nov 1551, blockaded for seven months by the imperialists, under Wallenstein, in 1629, and barbarously sacked by Tilly on 10 May, 1631 It was given to Brandenburg in 1648, was taken by the French, 8 Nov 1806, annexed to the kingdom of Westphalia, 9 July, 1807, restored to Prussia, May, 1813 Valuable fine art collection burnt 6 April, 1891 Population, 1890, 202,325, 1900, 229,663

The *Magdeburg Experiment* is shown by means of a hollow sphere, composed of two hemispheres, fitting air tight When the air is exhausted by the air pump, the hemispheres are held together by the pressure of the atmosphere, and require great force to separate them The apparatus was suggested by Otto von Guericke, the inventor of the air pump He died in 1686 *Brande*

MAGELLAN, STRAITS OF (connecting the Atlantic and Pacific oceans), was passed by Fernando de Magelhaéns (Magellan), a Portuguese, on 27 Nov 1520 He gave the latter ocean its name on account of its calmness Magellan completed the first voyage round the world, with a fleet of discovery fitted out by the emperor Charles V, but was killed in 1521 The Spaniards had a fort here, called Cape Famine, because the garrison perished from want

MAGENTA, a small town in Lombardy, near which the French and Sardinians defeated the Austrians, 4 June, 1859 The emperor Louis Napoleon commanded, and he and the king of Sardinia were in the thickest of the fight It is said that 55,000 French and Sardinians, and 75,000 Austrians were engaged The former are asserted to have lost 4000 killed and wounded, and the Austrians 10,000, besides 7000 prisoners The French generals Espinasse and Clerc were killed The arrival of general MacMahon during a deadly struggle between the Austrians and the French, greatly contributed to the victory The contest near the bridge of Buffalora was very severe The Austrians fought well, but were badly commanded. The emperor and king entered Milan on 8 June following, MacMahon and Regnault d'Angely were created marshals of France A monument erected here in memory of the slain was solemnly inaugurated 4 June, 1872 —The red dye, rosaniline, obtained by chemists from gas-tar, is termed *magenta*; see *Aniline*

MAGI, an order of priests and teachers among the ancient Medes and Persians, with much political power One of them who on the death of Cambyses asserted that he was Smerdis, a son of Cyrus, and claimed the throne of Persia, was deposed by Darius Hystaspes, 521 B.C, and a massacre of the Magi followed. They retained their religious position

till the later Roman empire The constitution of the order is traditionally assigned to Zoroaster, the Zarathustra of the Zendavesta, whose time and very existence are uncertain, the 6th century B C being mentioned He is said to have taught the knowledge of Ormuzt, the supreme good principle, to the Magi, whom he classified as learners, masters, and perfect scholars, the possessors of all spiritual power, and the science of the age, see *Parsees* The name Magi has been applied to the "wise men" of *Matt* ii , and the Parsees at Bombay are descendants of the Guebres or fire-worshippers

MAGIC, see *Alchemy, Witchcraft*, &c The invention of the MAGIC LANTERN is ascribed to Roger Bacon, about 1260, but more correctly to Athanasius Kircher, who died 1680 Sir David Salomons, in a discourse at the Royal Institution on "Optical Projection," exhibited an arrangement of the magic lantern, in which by the use of lenses magnifying up to 4,500 diameters, he stated that he was enabled to magnify a postage stamp to the size of 2½ acres, 26 Feb 1892 See Godwin's "Lives of the Necromancers," 1834, and Ennemoser's "History of Magic," translated by W Howitt, 1854

MAGISTRATES, see *Justices* Stipendiary borough magistrates may be appointed by 5 & 6 Will IV c 76, 1853, and by 26 & 27 Vict c 97, 1863 The present arrangement of metropolitan magistrates (the chief sitting at Bow-street) was made by acts of parliament in 1792 and 1839 Eleven courts were appointed in 1840 Their salaries raised from 25 March, 1875 Henry Fielding, the novelist, was acting magistrate for Westminster and at Bow-street

MAGNA CHARTA Its fundamental parts were derived from Saxon charters, continued by Henry I and his successors On 20 Nov 1214, the archbishop of Canterbury and the barons met at St Edmondsbury On 6 Jan 1215, they presented their demands to king John, who deferred his answer On 19 May they were censured by the pope On 24 May they marched to London, and the king was compelled to yield The charter was sealed by John at Runnymede, near Windsor, 15 June, 1215 It was many times confirmed, by Henry III and his successors This last king's grand charter was granted in 1224, and was assured by Edward I , see *Forests* The original MS charter is lost The finest MS copy, which is at Lincoln, was reproduced by photographs in the "National MSS" published by government, 1865

MALTA, KNIGHTS OF A military religious order, called also Hospitallers of St John of Jerusalem, Knights of St John, and Knights of Rhodes Some merchants of Malfi, trading to the Levant, obtained leave of the caliph of Egypt to build a house for those who came on pilgrimage to Jerusalem, and whom they received with zeal and charity, 1048 They afterwards founded a hospital for the reception of pilgrims, from whence they were called Hospitallers (Latin, *hospes*, a guest) The military order was founded about 1099, confirmed by the pope, 1113 In 1119 the knights defeated the Turks at Antioch After the Christians had lost their interest in the East, and Jerusalem was taken, the knights retired to Acre, which they defended valiantly in 1290 John, king of Cyprus, gave them Limisso in his dominions, where they stayed till 1310, in which year they took Rhodes, under their grand master De Vallaret, and the next year defended it under the duke of Savoy against an army of Saracens The story that his successors have used F E R T (*Fortitudo ejus Rhodum tenuit*, or his valour kept Rhodes) for their device is much doubted From this they were also called *knights of Rhodes*, but Rhodes being taken by Solyman in 1522, they retired into Candia, thence into Sicily Pope Adrian VI granted them the city of Viterbo for their retreat, and in 1530 the emperor Charles V gave them the isle of Malta The order was suppressed in England in 1540, restored in 1557, and again suppressed in 1559 St. John's Gate, Clerkenwell, a relic of their possessions, still exists The emperor Paul of Russia declared himself grand master of the order in June, 1799 After the death of the grand master, Tommasi di Contara, in 1805, the order was governed by a lieutenant and a college at Rome, till Pope Leo XIII made count Ceschi à Santa Cisce (lieutenant since 14 Feb 1871) grand master, 28 March, 1879 The knights sent a hospital establishment into Bohemia during the war in 1866, which afforded great relief to the wounded and sick

MANIPUR (Manipore), a small native state, N E India, adjoining Assam and Burmah, population, 1881, 221,070, army about 5,000

The state was for long protected by the British from the attacks of the Burmese In 1834, Gumbheer Singh, the restored rajah, died, and was succeeded by his son, Chandra Kirti Singh, two years old The regent, Nar Singh, a relative, usurped the government, and ruled till his death in 1850, when the young rajah was restored, a British resident being afterwards placed in the capital, with good effect. Much trouble was given by rival members of his family till 1866, he died in 1885 or 1886. He left eight sons, who formed opposing parties The eldest, Sura Chandra Singh, became maharajah, and appointed his eldest brother, Kula Chandra Dhuya Singh, jubraj, or heir apparent, after wards termed regent, a weak, incapable man In Sept 1890, his brother, Takendrajil Singh, the senaputti, or commander in chief, dethroned the maharajah and set up the jubraj in his place The maharajah retired to Calcutta.

On 21 Feb 1891, Mr James W Quinton, chief commissioner of Assam, was directed to proceed with a sufficient force to Manipur, to recognise the regent, and to remove the senaputti He entered Manipur 22 March, with 470 men and officers, civil and military, and was well received by the regent and the senaputti, but could not succeed in getting the latter to attend a durbar or court Mr Quinton as an ultimatum required the surrender of the senaputti, the letter being taken by Mr F St. C Grimwood, political agent, without any result, 23 March On the 24th, colonel Skene proceeded with 250 men to arrest the senaputti at his house within the fort inclosure, of which they obtained possession after a sharp struggle, during which lieut Brackenbury was mortally wounded The senaputti had escaped About 10 A M, the Manipuris opened fire on the residency in front, and about noon on the rear, and shelled it About 4 P M the troops were withdrawn from the senaputti s house, and all the force was posted in the residency, which was seriously damaged by artillery about 5 P M, and the ammunition began to fall short About 7 P M negotiations were re-opened by letter from Mr Quinton, and the firing ceased, but the conditions offered by the regent could not be accepted Having been invited by the senaputti halfway between the residency and the palace, Mr Quinton took with him colonel Skene, Mr F St C Grimwood, Mr H Cossins, and lieut Simpson, unarmed, and without escort After a long parley, the party entered the fort and were seen no more, and it was afterwards discovered that they were all killed (beheaded or otherwise) The firing re-commenced about midnight The ammunition having been greatly reduced, it was decided to retire from the residency, and to march across the country to meet captain Cowley s advancing party This was done about 2 A M on the 25th, the party taking with them 17 wounded, and Mrs Grimwood, who displayed much judgment, courage, and humanity There was no serious resistance during the march, but a few skirmishes occurred About 10 A M they met captain Cowley's party, who supplied them with food and other assistance They continued their march, arriving, on 30 March, at Lakhipur on the Cachar frontier

Lieut. C J W Grant hearing, on 27 March, of the disaster at Manipur, volunteered to attempt the relief of the British captives, and marched with 80 native soldiers from Tamu in Burmah, 28 March, entrenched himself near Thobal, 31 March, held out against the attacks of the Manipuri army (about 3,000) till 7 April, and resisted negotiations judiciously, only 1 killed.

[Lieut. Grant was made major and otherwise honoured]

About 2,000 Manipuris, entrenched near Tamu, attacked and dispersed by general Graham's party, captain Drury being especially successful, 25 April, three columns under gen Graham and others from different directions converge at Manipur, which they find totally deserted, the regent, senaputti, and other princes having fled, 26 April, the palace had been blown up, the heads of Mr Quinton and his companions were found in the enclosure

Funeral ceremony was held over the exhumed bodies of Mr Quinton and his companions, 30 April general Collett was left in command at Manipur, some of the troops left The Manipuris returned to their homes, May, the regent and his minister were captured, 8 May, and the senaputti, 23 May, 1891

The regent, the senaputti, and prince Angao Sena, a younger brother, were tried for rebellion and abetting to murder, and sentenced to death (all appealed) 9–20 June, ,,

The sentences of death on the senaputti and the Tongal general, as implicated in the murders, were confirmed The sentences on the regent and his younger brother commuted to transportation for life to the Andaman Islands, forfeiture of property, announced 10 Aug The senaputti and the Tongal general hanged at Manipur, 13 Aug ,,

It was decided that Manipur should still be ruled by a native prince, 23 Aug, and Chura Chand, aged 5, great grandson of Nar Singh, was appointed rajah, 13 Sept dignity to be hereditary, subject to the government of India an annual tribute to be paid, declaration communicated Oct ,,

ROYAL MARRIAGE ACT, 12 Geo III. c 11, was passed in 1772, in consequence of the marriage of the duke of Gloucester, the king's brother, with the widow of the earl Waldegrave, and of the duke of Cumberland with the widow of colonel Horton and daughter of lord Irnham [By this act, none of the descendants of George II., unless of foreign birth, can marry under the age of 25, without the consent of the king at and after that age, after twelve months notice given to the privy council, they may contract such marriage, which shall be good unless both houses of parliament disapprove The marriage of the duke of Sussex with the lady Augusta Murray, solemnised in 1793, was pronounced illegal, 1794, and the claims of their son, sir Augustus d Este, declared invalid, by the house of lords, 9 July, 1844 He married lady Cecilia Underwood (afterwards duchess of Inverness), 1831

H R H the princess Louise was married to the marquis of Lorne by the queen's consent, 21 March, 1871.

HALF MARRIAGE *Semi-Matrimonium.* Among the Romans concubinage was a legitimate union, not merely tolerated but authorised. The concubine had the name of *semi-conjux.* Men might have either a wife or a concubine, provided they had not both together Constantine the Great checked concubinage, but did not abolish it. This ancient custom of the Romans was preserved, not only among the Lombards, but by the French when they held dominion in that country Cujas assures us that the Gascons and other people bordering on the Pyrenean mountains had not relinquished this custom in his time, 1590. The women bore the name of "wives of the second order" *Hénault* See *Morganatic Marriages.*

DOUBLE MARRIAGES. There are some instances of a husband and two wives (but they are very rare) in countries where polygamy was interdicted by the state. The first Lacedæmonian who had two wives was Anaxandrides, the son of Leon, about 510 B.C Dionysius of Syracuse married two wives, viz. Doris, the daughter of Xenetus, and Aristomache, sister of Dion, 398 B.C It is said that the count Gleichen, a German nobleman, was permitted, under peculiar circumstances, by Gregory IX., in A.D 1237, to marry and live with two wives. The Mormonites practise and encourage polygamy

FORCED MARRIAGES. The stat. 3 Henry VII (1487) made the principal and abettors in marriages with heiresses, &c., contrary to their will, equally guilty as felons. By 39 Eliz. (1596) such felons were denied the benefit of clergy This offence was made punishable by transportation, 1 Geo. IV (1820). The remarkable case of Miss Wharton, heiress of the house of Wharton, whom captain Campbell married by force, occurred in William III's reign Sir John Johnston was hanged for seizing the young lady, and the marriage was annulled by parliament, 1690.—Edward Gibbon Wakefield was tried at Lancaster, and found guilty of the felonious abduc-

tion of Miss Turner, 24 March, 1827 and his marriage with her was immediately dissolved by act of parliament.

MARRIAGES BY SALE. *Among the Babylonians, at a certain time every year, the marriageable females were assembled, and disposed of to the best bidder This custom is said to have originated with Atossa, daughter of Belochos, about 1433 B.C.*

MARS, a planet, next to the earth in order of distance from the sun, the spots on its surface were first observed by Fontana, in 1636 Two satellites named Phobos and Deimos, were discovered by professor Asaph Hall, at Washington, U S, 11 Aug 1877

M Dubois of Paris suggests that these satellites may be planetoids attracted by Mars, Aethra and another of these bodies having disappeared about the time of the discovery

M Schiaparelli, of Milan, describes configurations like canals, 1882, and M Perrotin since has mapped them and asserts that Mars has an atmosphere and clouds (1887)

"They have likewise discovered two lesser stars or satellites which revolve about Mars" — *Swift,* Gulliver's Travels—Voyage to Laputa, about 1726

Lowell (of Flagstaff observatory, Arizona) and others of late years have given great attention to Mars, the former succeeding in photographing some of the markings called "canals, 1905

MASQUERADES were in fashion in the court of Edward III, 1340, and in the reign of Charles II 1660, masquerades were frequent among the citizens. The bishops preached against them, and made such representations as occasioned their suppression, 9 Geo I 1724 They were revived and carried to a shameful excess in violation of the laws, and tickets of admission to a masquerade at Ranelagh were on some occasions subscribed for at twenty-five guineas each, 1776 *Mortimer* At the close of a bal masqué, given by Anderson the Wizard, 5 March, 1856, Covent-garden theatre was destroyed by fire.

MASQUES, precursors of the opera, introduced into England in the latter part of the 16th century; many were written by Ben Jonson, Beaumont and others, Inigo Jones designed the costumes, &c., Wm and H. Lawes, Banister, Locke and others composed the music. A very costly one was held at the Middle Temple on the marriage of princess Elizabeth, Feb 1613 Milton's "Comus," the music by Henry Lawes, was represented at Ludlow castle in 1634 "Beauty's Awakening," arranged by Mr. Walter Crane and Mr C R. Ashbee, presented by the members of the Art Workers' Guild at the Guildhall, 27 June, 1899.

MASS, in the Roman church, is the office or prayers used at the celebration of the Eucharist, in memory of the passion of Christ, and to this every part of the service alludes The general division consists in high and low, the first is that sung by choristers, and celebrated with the assistance of a deacon and sub-deacon, low masses are those in which the prayers are rehearsed without singing. Mass was first celebrated in Latin about 394, it was introduced into England in the 7th century Prostration was enjoined at the elevation of the host in 1201 Dr Daniel Rock, in "The Church of our Fathers" (1849), describes an ancient MS of "The Service of the Mass, called the Rite of Salisbury," compiled for that cathedral, by St. Osmund and others, during the 12th century The English communion service was adopted in 1549, see *Missal*, and *Ritualism*

METALS Tubal-Cain is mentioned as an "instructor of every artificer in brass and iron" (*Gen* iv) The Phœnicians had great skill in working metals Bunsen and Kirchhoff's method of chemical analysis by means of the spectrum has added cæsium, rubidium, thallium, indium, gallium, and others to the known metals. See *Elements*, *Mines*, *Iron*, and the other metals "Metallurgy," published by Dr John Percy, 1861-80, he died 19 June, 1889. "Electro-Metallurgy," translated from the German of Dr W Borchers, with additions by Walter G McMillan, published, 1897

METAMORPHISTS in the 15th century affirmed that Christ's natural body, with which he ascended into heaven, was wholly deified

METAPHYSICS, the science of abstract reasoning, or that which contemplates the existence of things without relation to matter The term, literally denoting "after physics," originated from these words having been put at the head of certain essays of Aristotle, which follow his treatise on Physics. *Mackintosh.* Modern metaphysics arose in the 15th century—the period when an extraordinary impulse was given to the study of the human mind in Europe, commonly called the "revival of learning" Hobbes, Cudworth, S T Coleridge, Dugald Stuart, and sir W. Hamilton, were eminent British metaphysicians, and Descartes, Pascal, Kant, Schelling, and Fichte, foreign ones. See *Philosophy*

METAURUS, a river in central Italy, where Hasdrubal, the brother of Hannibal, was defeated and slain, 207 B C, when marching with abundant reinforcements The Romans were led by Livius and Claudius Nero, the consuls The latter commanded the head of Hasdrubal to be thrown into his brother's camp The victory saved Rome

METEMPSYCHOSIS, a doctrine attributed to Pythagoras, about 528 B C, asserts the transmigration of the soul from one body to another It is also ascribed to the Egyptians, who would eat no animal food lest they should devour the body into which the soul of a deceased friend had passed They had also an idea that so long as the body of the deceased was kept entire, the soul would not transmigrate, and therefore embalmed the dead See *Buddhism*

METEOROGRAPH, an apparatus for the invention of which father Secchi of Rome received a prize at the Paris International Exhibition, July, 1867 It is self-acting, and registers the various changes of the atmosphere in the form of a diagram

METEOROLOGY (from the Greek *meteōros*, aerial), the science which treats of the phenomena which have their origin in the air, such as rain, lightning, meteors, fogs, &c The writings of Theophrastus, on meteorology, 3rd century B C, were translated by Jas G Wood, edited by G J Symons, published 1894 Aristotle, Bacon, Boyle, and Franklin wrote on the subject.

Meteorological Society of the Palatinate, established 1780

Meteorological Society of London, first met, 15 Oct 1823

John Dalton's essay on meteorology appeared in 1793.

Luke Howard's work on the clouds appeared in 1803, and his "Barometrographia" in 1848. See *Clouds*.

Sir W Reed published his work on the "law of storms" in 1838 The works of Daniell (1845), Kæmtz (1845), Müller (1847), and Buchan (1867) are esteemed.

The "British" Meteorological Society, established in 1850, chartered in 1866, became Royal, Oct. 1883. By the exertions of Mr James Glaisher, long the secretary, the apparatus at Greenwich was erected and meteorology has appeared in the "Greenwich Observations" since 1848 See *Balloon—Scientific Ascents.*

The Royal Meteorological Society's annual exhibitions began in 1880

Meteorological observatories have been erected in all parts of the globe

The Meteorological department of the Board of Trade, established in 1855, under admiral Fitzroy, commenced the publication of reports in 1857 The admiral published his "Weather Book" in 1863 His exertions are said to have overworked his brain and on 30 April, 1865, he died by his own hand The Meteorological office issues apparatus and instruction books to captains of ships and established observatories in many places in the empire It was handed over to the Royal Society in 1871, and endowed by Mr J P Gassiot. Annual reports on ocean meteorology, weather telegraphy and climatology issued

The Kew meteorological observatory given to the British Association in April, 1860 It was placed under the Meteorological council nominated by the Royal Society, but appointed by the treasury R. H Scott, secretary, July, 1877

At the recommendation of M. Le Verrier and admiral Fitzroy, meteorological information, obtained by the telegraph from the principal places in the United Kingdom, has been transmitted daily to Paris, and thence to other parts of Europe since 1 Sept. 1860.

Storm-warnings first issued in Holland through M Buys Ballot, 1860. His "law of the winds" points out the relation between the direction of the wind, and the atmospheric pressure.

Storm warnings first sent to the coast by the Board of Trade, 6 Feb and first published 31 July, 1861, suspended, 7 Dec 1866 reissued at Christmas, 1867, and have been since continued

Daily international bulletin of the imperial observatory at Paris, under the direction of M Le Verrier, first published in MS. 1 Jan 1858, first issued to subscribers, 4 Nov 1863 (This was the first chart with united maps.)

"*Daily weather charts*" first issued by the Meteorological Office, 1 Oct. (first prepared in MS 3 Sept. 1860), 1872, "*Weekly Weather Report*" first published, 11 Feb 1878

METEORS, LUMINOUS, include shooting stars, fire-balls, and falling stones or aërolites. They were described by Halley, Wallis, and others early in the 17th century The periodicity of the star showers about the 10th of August (termed in the middle ages St Lawrence's tears) was discovered separately by Quetelet, 1836, and by Herrick in 1837. The following are remarkable epochs for their annual return —2 Jan, 29 July, 3 and 9-12 Aug; 14-16 Nov., 11 Dec. *R P Greg*. See *August*.

The magnificent continuous star-shower of 14 Nov 1866, had been predicted by professor Newton some time previously A fine display occurred on the night of 13 Nov. 1833, in the United States. A similar phenomenon had been witnessed by Humboldt at Cumana (S.A.), 12 Nov 1799, and by Dr *D* Olmsted, at New haven (U S), 13 Nov 1833 They were well observed in Britain and Europe, 27 Nov 1872, and in Southern and Western Europe, 27 Nov, 1885.

AËROLITES, falling-stones, accompanying meteors, are found in our museums They contain iron, nickel, and other minerals

Explosion of an aërolite above Madrid, windows shattered, houses damaged, etc, 9 29 A M 20 Feb 1896, another exploded, S of Cyprus, 18 April, 1896

Mr Norman Lockyer (K C B 1897), announces his theory, based on spectrum experiments, that all self luminous bodies in the celestial spaces are composed of meteorites or masses of vapour produced by heat brought about by condensation of meteor swarms due to gravity, Royal Society, 17 Nov 1887 A great meteor or fireball seen in England, 25 Jan 1894

Dr G Johnstone Stoney reported his studies of the November meteors, at the Royal Institution, London, 14 Feb. 1879, and 18 Feb. 1897

METHUEN TREATY, a treaty for regulating the commerce between Great Britain and Portugal, made 27 Dec 1703, concluded by Paul Methuen, our ambassador at Lisbon It greatly favoured the importation of port wine into this country by lowering the duty, to the discouragement of French wines It was abrogated in 1834

METHYL, a colourless inodorous gas, a compound of hydrogen and carbon, obtained in the free state first by Frankland and Kolbe separately, in 1849

METHYLATED SPIRITS By an act passed in 1855 a mixture of spirits of wine with 10 per cent of its bulk of wood-naphtha, or methylic alcohol, is allowed to be made duty free for use in the arts and manufactures, not less than 450 gallons being made at one time In 1861 an act was passed permitting the methylated spirits to be retailed by licence

METONIC CYCLE, a period of 19 years, or 6940 days, at the end of which the changes of the moon fall on the same days, see *Calippic Period*, *Golden Number*

METRIC SYSTEM. Before the revolution there was no uniformity in French weights and measures. On 8 May, 1790, the constituent assembly charged the Academy of Sciences with the organisation of a better system. The committee named for the purpose by the academy included the names of Berthollet, Borda, Delambre, Lagrange, Laplace, Méchain, and Prony Delambre and Méchain were charged with the measurement of an arc of the meridian between Dunkirk and Barcelona, and from their calculations the *mètre*, which is equal to a ten-millionth part of the distance between the poles and the

equator (3·2808 English feet) was made the unit of length and the base of the system by law on 7 April, 1795 The system was completed in 1799, and made by law the only legal one on 2 Nov 1801. A decree on 12 Feb. accommodated the old measures to the new system, but on 4 July, 1837, it was decreed that after 1 Jan 1840, the metric and decimal system in its primitive simplicity should be used in all business transactions The example of France has been followed by the greater part of Europe, but not yet by Great Britain

MORMONS (calling themselves the Church of Jesus Christ of *the* LATTER-DAY SAINTS). This sect derives its origin from Joseph Smith, born at Sharon, Vermont, 23 Dec 1805, called the Prophet, who announced in 1823, at Palmyra, New York, that he had had a vision of the angel Moroni In 1827 he announced that he found the book of Mormon, written on gold plates in hieroglyphics. This book was said, by the opponents of the Mormons, to have been written, about 1812, by a clergyman named Solomon Spaulding, as a religious romance in imitation of the scripture style, this is denied by the Mormons, and the discovery of the MS of that romance by president Fairchild, of Oberlin college, in 1884, supports the Mormons' contention. The distinguishing characteristics of the sect are its belief in a continuous divine revelation through the inspired medium of the prophet at the head of their church, the practice of polygamy, and a complete hierarchial organization, which comprises two priesthoods, the "Melchizedek," or high priesthood, and the "Aaronic or Levitical," the lesser priesthood which ministers in temporal matters The "First Presidency," composed of the president of the whole church and two counsellors, is the supreme authority The Mormons command the payment of tithes, and encourage labour Missionaries are propagating these doctrines in Europe, Australasia, Africa, China, Japan, South America, and other countries See Hepworth Dixon's "Spiritual Wives", J H Kennedy's "Early Days of Mormonism", H H Bancroft's "History of Utah."
